SUMMARY

Frontend Developer with over 6 years of experience building clean, responsive, and scalable user interfaces. Skilled in React, Tailwind CSS, and modern JavaScript frameworks. Proven ability to collaborate cross-functionally and optimize web performance for high-traffic applications. Strong focus on clean architecture, UX excellence, and business impact.

TECHNICAL SKILLS

HTML5	ReactJS	Vue.js	Git
CSS3	Tailwind CSS	Selenium Testing	Figma
Javascript	Shopify Development	Postman	Responsive Design

PROFESSIONAL EXPERIENCE

React Developer, Bridzia Sdn Bhd July 2024 - July 2025

- Delivered modular, maintainable React applications focused on scalability
- Implemented responsive UI aligned with modern UX best practices
- Improved code quality and performance through clean architecture
- Improved checkout page load speed by 35%

Front End Developer, SIRCLO Jan 2019 - June 2024

- Built and scaled React-based frontend systems for high-traffic platforms
- Developed reusable UI components improving development efficiency and consistency
- Delivered pixel-perfect responsive UI aligned with design systems
- Optimized performance for faster load times and smoother UX

EDUCATION

Bachelor of Science in Computer Science 2012 - 2018

- Christian Duta Wacana University
- Major in Information Technology.

KEY PROJECTS

Guardian Malaysia – E-commerce Platform Optimization

Worked as part of a 4-person team on Guardian Malaysia, one of the largest health and beauty retail chains in Malaysia. Identified that the cart and checkout pages were loading slowly due to over-fetching of GraphQL data. Analyzed the actual UI data requirements, restructured nested queries, and removed unnecessary fields. **Result: cart and checkout pages became 80% faster, directly improving user experience and conversion rate.**

Seiko Boutique Indonesia – Shopify Site

Built and launched a complete e-commerce website for Seiko Boutique Indonesia using Shopify within just 3 days. Handled end-to-end delivery including theme customization, UI/UX implementation, product configuration, and final deployment. **Result: a clean, responsive, and fast-loading website for a prestigious global watch brand.**
